\*Varies depend upon ceiling height , installation , location of construction  
 \*\* Ratios according European standard tests : EN13229

Impressions are everything, and the D1350 is the epitome of luxury, elegance and power. The largest fireplace in the Design Collection range, nothing absolutely nothing - can compare to its beauty and capacity. The D1350 can be encompassed in any surround design you desire, its clean and uninterrupted line is enhanced by the use of a clever removable handle, a ducted hot air system allows you to infuse warmth into every corner of every room, and a beautifully conceived ash extractor makes cleaning your fireplace a matter of consummate ease. The D1350 is tested AS2918. Considering the grandeur of the fireplace, it requires surprisingly little clearance to install, and can be placed into a vast array of materials, including plasterboard. The only explanation? Noblesse oblige...
